

# Cero Plus Scraper™

## Entrance Mats • Indoor

Cero Scraper Plus mats are specially designed to provide outstanding performance in terms of dirt pick up and moisture absorption.

- The monofilament fibres work as tough scrapers, combined with a high twist and heat set bicolour multifilament yarn which is designed for dirt and moisture absorption.
- Its unique pile construction, combined with a long-lasting washable rubber backing offers superior performance in terms of function and long-term appearance retention.
- the audible presence of the monofilament scrapers encourages people to wipe their feet over the mat, which further increases the functionality of the product.
- Because they can withstand washing at high temperatures, Cero Scraper Plus mats can also be used in industrial applications where heavy soiling can occur.
- Cero Scraper Plus mats have a high level of UV resistance and are extremely colourfast.
- There is 34% postindustrial recycled content in the rubber polymer.
